DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-16 and 24-31 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

1. Claims 1-8 are objected to because of the following informalities: In line 6, "a" should be --as--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-16 and 24-31 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wainwright et al, US Patent No. 5,532,2925.

Wainwright et al discloses coating compositions such as paints that comprise a binder, colorant, melamine, ammonium phosphate, pentaerythritol, blowing agent and charring agent. Fibrous fillers and additives may also be used. When the dry mixture of components are formulated into a wet coating composition, the amounts of components overlap with those amounts claimed by applicant. See cols 4 and 5. The act of providing a surface with a paint formulation generally perceived as painting. This process step is considered to be anticipated and/or obvious in view of the patented disclosure. The presently claimed invention presents nothing of a novel nature. See the abstract, col. 1, lines 31-60, col. 3, lines 29-34, col. 4, lines 21 through 59 and col. 5, lines 8-56.
